P R E F A C E.

HAVING been frequently requested to publish some Games at Chess that have actually occurred in play, I have selected the following Fifty, which I hope will be found instructive as well as entertaining; for some of these I am indebted to my friends, the remainder were played between myself and some of the best players, not only in this country, but also in France and Germany.

The reader must not expect that Games actually played will stand the test of severe criticism, for even among excellent players, two, three or more mistakes occur in almost every game, he will therefore be pleased to look indulgently on these now submitted to his perusal.

During a late excursion into Germany, I happened to be staying for a few days in the neighbourhood of Stroebeck, a village long celebrated for its Chess players, thinking it would interest the reader, I have given some account of this place, with particulars of the game practised there, and a few games which I played during my stay.

AN ACCOUNT
OF THE
VILLAGE OF STROEBECK,
&c.

DURING an excursion into Germany in the summer of 1831, I stayed for a few days at Halberstadt; in the neighbourhood of this town is a small village called Stroebeck, which has been celebrated for some centuries on account of its inhabitants being very good Chess players. Some have stated that this village holds its lands upon the tenure of forfeiture, if any one of their community lose a game at Chess, and that therefore they decline finishing a game with a stranger, this is however erroneous. The following is the account given by the inhabitants of the origin of the game of Chess in the village.

A dignitary of the cathedral at Halberstadt was exiled to Stroebeck, and being consequently deserted by his former friends, he became the more attached to the inhabitants of the village, and determined on teaching them the game of Chess; he found to his

delight that they became partial to it, and made great progress in it; he soon felt himself doubly recompensed for the trouble he had taken, for not only did they become proficient in the game, but it afforded him many opportunities of improving their morals and behaviour, which became visible in their intercourse with their neighbours; after a time he was recalled and became Bishop of Halberstadt; he, however, did not forget *his* Stroebeck as he used to call it, but on the contrary, often went there and conferred many benefits on the community, amongst others he instituted a free-school there. Such is the account given by the inhabitants of the village.

Stroebeck, (formerly called Stroepke,) lies between Halberstadt and Brunswick, at a distance of about six miles from the former place,—you save about a mile by crossing the fields to it; the spire of the church may be seen on the left-hand after about a quarter of an hour's walk from Halberstadt. The village lies in a hollow, about a mile from the high-road, and contains about one hundred and twenty houses. I walked over on a Friday afternoon and introduced myself to the clergyman of the village, whom I found an obliging and well-educated man; he informed me that the day I had chosen was an unfortunate one for me, for owing to the fineness of the weather all the inhabitants were out in the fields, gathering in the harvest; he hoped, therefore, as he himself was ignorant of the game, that I would come over on the following Sunday, when I might be sure of finding some of the villagers at home. He informed me that the game is still much played there, and that they have several strong players; though

himself no player of the game, yet he is so persuaded of the advantage of cultivating it, that he encourages the children who attend the school to practise it at proper times, and has succeeded in obtaining the grant of a small sum annually from the community for the purchase of six Chess Boards and Men, to be given to the best six players among the scholars, the number of whom amounts to forty-eight; the method of ascertaining who are the best is, in the first instance, to have two sets of tickets, each set numbered from one to twenty-four, these are drawn by the boys, then the two ones, two twos, &c. &c. play together; those who lose go out, and the remaining twenty-four draw numbers in a similar way and so on, until only six winners remain, to whom the Boards are given. It has been incorrectly stated that the masters are obliged to teach the children the Game of Chess.

I took my leave of the clergyman with whom I had so much reason to be pleased, and proceeded to the public house of the village, the landlord of which told me also that I must come on Sunday if I wished to play with any of them. In front of the public house there is a sign of a Chess Board in the wall, it is rudely made of stone; in the public room were hung up three boards,—one the common Chess Board, and the others larger for the use of those who play the Courier Game.

On the Sunday following I walked over in the afternoon and called on the Syndic of the village, who obligingly offered to accompany me to the public house, where he showed me their old Chess Board and Men, which were carefully locked up; the Board is of a

L

large size, being above two feet square, including the border, which is about four inches broad; on the border is a representation of the village of Stropcke, (it is spelt thus,) but not in *bas relief*, according to Mr. SILBERSCHMIDT's account, but rather in rude Mosaic; there appears to have been at that time three towers or steeples in the village, two only of which now remain, the third having been taken down and the building converted into a saw mill. According to an inscription on the Board, it appears to have been presented to the village by the Elector of Brandenburg, on the 13th of May 1651; on the other side the Board is divided into 96 squares, (12 by 8,) this is intended for the Courier Game, which is played with the usual Chess Men, to which are added for each player, four pawns, two couriers, a man, and a fool, which last two are now called state counsellors.

The said Elector also made them a present of two sets of Chess Men, one of ivory, with which the following games were played, and the other of silver, half of which were gilt; the latter set is lost, having been lent to the Dean and Chapter at Halberstadt, who forgot to return them; this occurred so long since, that no one now living recollects having seen them: the ivory set is much too small for the Board; the pieces are in tolerable preservation, and have nearly the same shape as those commonly played with; the upper part of the bishop, instead of being shaped like a mitre, has the form of a scoop. They have only two Works on Chess, one of them an imperfect copy of GUSTAVUS SELENUS, the other KOCH's Codex der Schachspielkunst, in two volumes; the former they have had a long time, the

latter was presented to them some years since by their present worthy Pastor.

Having seen all the curiosities, I invited one of the party to play with me, to which he readily agreed. I believe it was formerly their rule never to play with strangers but for money ; of course I expected they would have named a stake to play for, but this was not the case, and accordingly we did not play for any thing ; whether this alteration in their custom arises from their having latterly been losers, I know not, but think it very probable, for I was assured by Mr. SILBERSCHMIDT, that they usually played for ten Frederick's d'or a game.

I was told they had several very strong players ; I know not whether the party with whom I played is so considered, I should call him a weak player, and from what fell in the course of conversation, I much doubt whether they have any to whom a first-rate player could not give a knight.

The Courier Game is now seldom played at Stroebeck, GUSTAVUS SELENUS states that it had been played there from time immemorial, and that the common game is derived from it. In the Courier Game the bishop's move was limited to three squares, for example : a bishop being placed on the king's fourth square, could be played only to the following squares, viz. K. Kt. second square, Q. B. second square, Q. B. sixth square, and K. Kt. sixth square ; he had no power over the middle square, but could leap over it like a knight, though occupied by one of his own, or his adversary's pieces. The queen was very much restricted in power, not being able to move farther than one square at a time, backwards or forwards, continuing always on the same colour ; on the

Figured

first move she had, however, the privilege of making a joyous leap (Freudensprung) from her own square to her third square. The first three moves in the Courier Game were always the two rook's pawns, and the queen's pawn two squares each, no other moves were allowed.

M. L. M. GUSTAVUS SELENUS states, that in Aschersleben, which like Stroebeck is in the ancient country of Ascania, the city arms contain a Chess Board, and also that a portion of a Chess Board is to be found in the arms of the Duke of Anhalt, and as Aschersleben and Stroebeck are both in the Duchy of Anhalt, it is probable that Chess was played in several places in the Duchy besides Stroebeck.

The Game at Chess as now played at Stroebeck, differs from that commonly played in the following particulars :—

The pieces being placed as usual, each party is obliged to play his king's rook's pawn, queen's rook's pawn, and queen's pawn two squares, and the queen to her third square.

No other pawn can be moved two squares at a time.

The king is not allowed to castle. (I was informed by one of the inhabitants that some of the players have lately allowed castling.)

When a pawn has reached the last line, it does not at once assume the powers of a queen or any other piece, but it must first make three joyous leaps (Freudensprung) of two squares at a time, until it reach the square on which it was at first placed, for example : suppose your pawn to be on the adversary's K. rook's square, its first leap will be to your K. rook's sixth

square, the second to your K. rook's fourth square, and the third to your K. rook's second square ; on its reaching this last square it has all the powers of a queen, &c. ; it must moreover be observed, that while your pawn remains on the adv. K. rook's square, it cannot be taken by the adversary, but the moment it has made a leap, it may be taken ; moreover, the pawn is not permitted to leap over any piece or pawn, nor does it possess any power in its way back to its original square. In consequence of these peculiarities, many games which could easily be won elsewhere are drawn at Stroebeck ;—for example :

*White.**Black.*

K. at Q. sixth square.

K. at adv. K. R. square.

P. at K. sixth square.

P. at K. fifth square.

In this position the game must be drawn, because your front pawn never can become a queen, owing to the other pawn preventing it from making the three leaps ; even if you had a knight or bishop besides, you could not win unless you could force his king to take one of the pawns.

In the following Games, the White pieces were played by the Author :—
